MIRROR, ALTA., WEDNESDAY JUNE 10, 1926

\$2.00 a year in advance

## Provincial Elections June 28th

### Robertson and Pratt Speak for Conservatives

Last week was a busy week in the political field as far as Mirror was concerned.

On Friday evening the Conservative candidate, assisted by Mr. E. V. Robertson spoke to a small audience in the Town Hall.

Mr. Robertson, introduced by Dr. MacLennan, who was chairman for the occasion, at first reviewed the doings of the Liberal party from 1905 to 1921, flaying them for inactivity and extravagance, quoting statistics to show that when they quit office they had accumulated a debt of some \$52,000,000 and that they had no constructive policy for the future.

His main speech was directed against the present government. He spoke of the seeming extravagance in that while they maintained a surplus of \$189,000, it was merely a matter of the juggling of figures inasmuch as the sum of \$246,000 which represented 40 per cent of road monies donated as the federal government's share was never spent for roads but was devoted to the general revenue account, which more than accounted for the so-called surplus. In addition to this they raised by taxation over three million more than their predecessors had, as well as an income of a million dollars from the liquor act.

He next criticized the educational system of the province, claiming that there were too many unnecessary subjects taken up to the detriment of the old necessary ones. He then took up the question of redistribution, claiming as one of the planks of the Conservative platform was a reduction in seats to the number of twenty or so and at the same time reduce the indemnity by \$500.

He spent considerable time on the natural resources question, also the tangible assets of the province and closed with an appeal to the voters to support the Conservative candidate.

#### Mr. Pratt Speaks

Mr. Pratt, the candidate was then introduced, and in a few preliminary remarks introduced himself further. He then picked up and further dealt with the questions of the day. He particular attention to the personality and past performances of the leader of the Liberal party referring to him as a well-blended political gentleman, as he had already served three other parties before lining up with the Liberal party. He also explained the method of voting which is under the P. R. system. He closed with asking for the support of all who wished to see a change.

### Fourth Fortnightly Crop Report 1926

Issued by the Department of Agriculture, Government of Alberta, May 29, 1926

Seeding of all grain crops in the province is now practically completed. A small amount of oats and barley seeding remains to be done, but the end of the month will see all crops in the ground (except green feed which is considerably earlier than in former years.

Conditions continue to be generally satisfactory. The weather since last report has been showery

### Orangemen Attend Their Church Service

The members of the United Orange lodges met for their annual church service on Sunday night last. The service was conducted by the Chaplain of the order, who preached a very appropriate sermon. The members of the Girls' choir rendered the beautiful selection "Anchored in Jesus." The church was packed to the doors, the members of the lodges attending numbering some thirty odd, who were lead by the officers.

### Hon. Mrs. Parlbry Gets Nomination For U. F. A. Party

One of the most successful conventions ever held in the Lacombe Constituency was held today by the U.F.A. nominating convention assembled to select a candidate to carry the banner in the present election.

Over 40 delegates and over 100 invited visitors were in attendance and while two nominees, that of R. E. Chown, and Hon. Mrs. Parlbry, the latter secured the nomination.

The best of feeling prevailed throughout the whole meeting and all were confident that the present member will be returned to help carry on another Farmers' government.

and most of the districts in the province have been benefitted thereby. precipitation for May to date has ranged from half an inch in most of the districts to nearly two inches in the Grande Prairie and Peace River territory. In the south-eastern district, there have been good local showers, but no general rains. Grass and winter rye are in need of rain, but other crops are looking well; there has been no further serious damage from soil drifting or from pests. Winter wheat has come through without loss.

In the south-western district there has been some rain, and the grain crops have a good start, but dry conditions prevail generally and rain is needed over practically all of this section. Winter wheat is looking well and rye is headed out. In the more central and northern territory precipitation has been somewhat heavier, and all crops are showing good growth. Damage from cutworms, wire worms and grasshoppers has been reported to a small extent in certain limited areas but generally speaking there appears to be no further fear from this quarter of serious interference with the growth of the crops.

In the irrigated areas in the south the first crop of alfalfa is approaching the harvest period and is in excellent conditions. Thinning of sugar beets has commenced. All irrigation operations are proceeding briskly.

#### McLeod-Brackney

A very pretty wedding took place today at 11 o'clock at the home of Mr. and Mrs. J. B. Brackney, of Mirror, when their daughter,

Lucille Estella, became the bride of Thomas James McLeod. The bride who was becomingly gowned in a handsome dress of white Georgette crepe over white satin, and carried a bouquet of American Beauty roses, was given away by her father. Miss Anna McLeod, wearing a charming dress of Springtime silk, performed the duties of bridesmaid, while the groom was supported by his brother John W. The ceremony was performed by Rev. Wood of Mirror and Rev. Bradley of Bashaw. After the ceremony the guests sat down to delightful wedding luncheon.

### Puffer and Shaw Address Large Audience

A crowded house greeted the Liberal candidate and Capt. Shaw leader of the Liberal party at the meeting held Saturday afternoon. The old Liberal war-horse, Mr. Traynor, of Bashaw, occupied the chair, and in a few witty remarks introduced the speakers, calling on the candidate, Mr. Puffer to speak first.

The speaker reviewed the condition in the province and the part he has taken in politics before and since Alberta was made a province. He answered opposition criticism as to the debt incurred by the Liberal party and stated that this was necessary owing to the need of public buildings, roads, revision of the statutes, etc., and were without capital. He challenged his critics to put their finger on one instance where he had bestowed political patronage to any being and stated that he always got what he went after for his constituency. He closed by asking the voters for their support on the 28th of June.

Capt. Shaw was then asked to take the platform, and in a cool, deliberate ringing speech took to task the opposition and defended the Liberal administration.

The speaker first took up the expenditures, and debt left by the Liberal and seemed to satisfy his hearers in this respect.

In his criticism of the present government he followed with the same statistical figures that the Conservative speaker had the evening before, with the exception of the educational system and the cutting of the indemnities.

He took up the organization of the Conservative party and complimented the Conservative leader for some of his policies, for they were taken from the Liberal platform, but the rest were deflated balloons which they were trying to inflate, and that they were hiring a bunch of steam-pressure closers by asking the voters for their support on the 28th of June, to run their campaign for them.

## CALCIMO

### Sanitary Wall Coating

A dry powder ready for use when mixed with cold or warm water. Made under the famous Murel's formula. Look over your rooms and decide on your colors, then try CALCIMO for satisfactory results.

## WORLD HAPPENINGS BRIEFLY TOLD

The Spanish Government plans to establish at Cape Juby an air port open to fliers of all nations.

The Academy of Moral and Political Sciences has elected King Albert of the Belgians to succeed Woodrow Wilson as a foreign associate member.

Princess Marie Jose, daughter of King Albert of Belgium, was a plane in a contest conducted by the Belgian Medical Union.

The Japanese Emperor has given permission for the fitting of rooms of the Imperial Palace and also the ancestral shrines.

The Washington Post says King Alfonso and Queen Victoria of Spain are to make an extended visit to the United States, probably this autumn.

Dr. Beaumont S. Corbett, of Brockville, Ont., has been chosen to conduct a research on pernicious anemia, provided for by the late Jas. B. Duke, American chemist magnate.

Prince Alexander Romanowich, second cousin of the late Czar of Russia, has arrived at New York to establish a new Pan-Russian Long Island for Russian emigrants.

A League of Nations commission of inquiry is leaving for Persia soon to study ways and means of substituting other crops for the poppy in an effort to curb opium production.

Magistrates and prosecutors in Silesia have been punishing violators of traffic laws, are learning to drive automobiles themselves in order to discover how easily traffic rules can be violated.

It was announced that Hon. J. E. Caron, minister of agriculture in the Quebec Government, is leaving on April 15 for France. He will represent the province at the international congress of agriculturists, which is to be held in Paris.

## Pain in the Back Yields to Nerviline

If you have failed to secure relief from other remedies, rely on lots of good old "Nerviline," the strongest, most penetrating pain relief on the market. Nerviline acts quickly on small pains and is the surest to drive out the big ones. It's because every drop of Nerviline acts so quickly that it drives away pain that ordinary oils and liniments won't touch. Large 35c bottles at all dealers.

### John Dixon Dies in Ottawa

John Dixon, former newspaperman, director of publicity of the committee of conservation during war years, and director of publicity of the intelligence services of the natural resources branch, department of interior, died at Ottawa, aged 57. Born in St. Thomas, Ont. he was at one time manager of the Edmonton Bulletin. A sister, Mrs. W. H. Hales, of Cranbrook, B.C., is among his survivors.

### Will Speak For Himself

The Prince of Wales is reported to have said to an old wife recently: "When there is an interesting announcement to be made about me I'll make that announcement myself."

The man who tried to drown his troubles always seems to have an idea that they are located in his stomach.

## Choose Quebec City For Press Convention

C.W.N.A. Will Meet This Year June 16, 17 and 18

At the half-yearly directors' meeting of the Canadian Weekly Newspapers' Association held at Winnipeg, it was decided to hold this year's convention at Quebec City, June 16, 17 and 18 respectively.

A committee was appointed to arrange the details.

L. J. Ball, Toronto, presented the managers' report for last year. This was discussed and adopted. Invitations to hold the 1927 convention were received from London, Ont., and Banff, Alta. The decision as to where the convention be held was left in abeyance. The meeting was presided over by J. A. McLaren, The Barrie Examiner, Ontarior.

## Enjoy The Pleasure Of Perfect Health

Dodd's Kidney Pills Purify the Blood, and Pure Blood Means Good Health

Mr. J. Leveille was Relieved of Kidney Trouble by Dodd's Kidney Pills After Other Remedies Had Failed. St. Leticia, P.Q.—(Special).—"For three years I suffered with bad kidneys. I tried different remedies but they did me no good. Having read in your almanac of numerous persons being relieved, I tried four boxes of your excellent pills and felt better immediately. I shall tell my relations and friends that Dodd's Kidney Pills with perfect confidence."

This relief comes from Mr. J. Leveille, a well known resident of this place. If you require any of your neighbors who will find scores of people who have discovered in Dodd's Kidney Pills relief from some form of kidney trouble. It may have been the dry, itching skin, dizziness, nervousness and inability to get refreshing sleep at night, the latter stages of the disease, or it may be diabetes, rheumatism or some other of the dangerous diseases that mark its advanced stages.

**ECLIPSE FASHIONS**  
Exclusive Patterns  
by *Shirley*

Delightful Sports of the Two-Piece  
Suits

Many points of interest centre in this sports frock. First, the material, light green and fawn, is the latest thing for these casual costumes. Then there is the deep v-neck and back from which extend two box-plaits. The long sleeves are gathered into tight little wrist-bands of contrasting color silk. This harmonious being, which is joined to a canonic top, gets its fullness by repeating the box-plait of the overblouse. The blouse, No. 1272, is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of material. The skirt, No. 1273, is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 1 1/2 yards of 3/4 inch material, with 1 1/2 yards lining for the canonic top. Price 50 cents each pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents each copy.

HEALTH-GIVING VITAMINS

### May Reduce Aviation Cost

British Experimenting With Crude Oil Engine For Aeroplanes

Research work, which may lead to a sweeping reduction in the running costs of aircraft, and so permit commercial aviation to pay without governmental subsidies, is in progress at the Royal Aircraft Establishment, Farnborough, and is nearing a decisive stage.

The crude oil engine, which has been undergoing development for a long time, is about to be tested in the air. It has been installed in a large biplane, which normally mounts a 1,000 horsepower engine. Its crankcase is made of a special alloy, and many unconventional features are incorporated in the design.

The effect which the production of a satisfactory engine of this type would have on civil aviation can be seen if a comparison of running costs is made between an ordinary three-cylinder freight-carrying machine and a similar machine fitted with a crude oil engine. The conventional machine would cost about 14 cents per ton-mile, whereas the other would cost only three cents per ton-mile. A motor loss, it may be added, costs about one-cent per ton-mile.

### Vancouver Grain Shipments

More Grain Being Shipped Through Pacific Port Than Ever Before

Vancouver this crop year has ever before, according to figures prepared by the Vancouver Merchants' Exchange. The total for the crop year, 1925-1926, to the end of January, was 25,311,996 bushels actually shipped to sea. For the same period during the crop year 1924-1925, there was a movement of 15,846,787 bushels, and the big year of 1923-1924 had a total export of 21,465,594 bushels at the end of January, 1924.

### TOO LITTLE BLOOD

The Cause Of Nearly All The Everyday Ailments Of Life

Too little blood—that is what makes men and women look pale and sallow and feel languid. That is what makes them drag along, always tired, never really hungry, unable to digest their food, breathless after even slight exertion, and often feeling that life is scarcely worth living. The doctors tell them they are anemic, and the plain English being too little blood.

More weak, anemic people have been made stronger, more cheerful by taking Dr. Williams' Pink Pills than by any other means. The case of Mrs. A. P. Foster, Bowden, Alta. is an excellent proof of this statement. Mrs. Foster says: "Some years ago I was very badly run-down. My doctor attended me for several months and then told me I had better go South to spend the winter as my blood was so poor that he feared I would not stand the cold of our winter. I took his advice and went to my winter home as he said. As she saw me she said, 'Dr. Williams' Pink Pills are what you need.' She got the pills for me and I began taking them. I had intended staying three months, but at the end of the second month I came home a new woman. When the doctor saw me he said, 'You are all right now, but don't let yourself get run-down again or nothing will save you.' Then last winter I had the influenza, which left me as weak and pale and miserable as before. Again I took Dr. Williams' Pink Pills and again they made me well and strong. I can gratefully recommend the pills for I feel that they have saved my life. Weak, ailing men and women should begin taking Dr. Williams' Pink Pills today and tell the speed of improvement that follows. You can get these pills from medicine dealers or by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont."

### Royal Canadian Humane Society Awards Medal

J. S. Partridge, Field, Receives First

Gold One Presented In 25 Years

The first gold medal presented in 25 years by the Royal Canadian Humane Society will go to J. S. Partridge, of Field, B.C. Mr. Partridge effected a heroic rescue at the great personal cost when he saved the occupants of the Yoho, B.C., railway station from certain death beneath a landslide, by clambering down a steep mountain face, he rescued the men sleeping in the station only a few minutes before the slide demolished the building. He then flagged an oncoming train and thus averted a second grave accident.

### Canadian Flour For the Orient

According to booklets made up for the present, flour shipments to the Orient in the next three months from the port of Vancouver will run to about 500,000 tons, practically all the tonnage going to Shanghai and London.

## ON THE AIR

What is Doing in the World of Radio

Radio is becoming popular among the Russian masses. About 1,000,000 home dwellers now have amateur wireless sets.

One of the tallest towers in the world, built exclusively for commercial radio purposes, has been completed for the German ministry of posts and telegraphs at Koenigsberg, near Berlin.

The Swedish Air Traffic Society is planning an air fleet of "taxicabs." These flying vehicles will be equipped with radio so that the passengers can enjoy concerts as they sail through the air.

The source of static and its favorable play-ground, cannot be located, according to Dr. Lester Brookstahler, Northern University physicist, who has just completed tabulation of reports from a nation-wide radio test.

Another dream has come true in the radio world with the perfecting of the batteryless set, over which concerts may now be received with a volume and clearness of tone equal to that of the best of the battery-supplied receivers.

Station KOA, Denver, will provide mountain newspaper editors with information in case of storms or blizzards which make telephone and telegraph communication impossible. This service is planned to connect the "snowbound towns" with the outside world.

The establishment within the next three months of a plant in Winnipeg for the manufacture of radio vacuum tubes, is announced by N. L. Nosh, manufacturer, of Minneapolis, Minn. Creation of this new industry in the Manitoba capital, Mr. Nosh declared, would result in an appreciable reduction in the price of tubes.

A phenomenon puzzling electrical experts at the head of the lakes is a "radio pole" on Simpson Street in Port William from which it is claimed the strains of music and the announcement that the music was emanating from a broadcasting station in Pittsburgh may be heard. Persons claim that while standing at the foot of the pole, they have heard the music and announcement clearly on different occasions. The pole is situated in the business section of the city. It carries a network of wires to and from a transformer.

### Prince Has Ayrshire Title

Earl of Carrick Was Handed Down From Robert Bruce

When the Prince of Wales visits Ayrshire in March he will be making acquaintance with a county from the southern division of which he takes one of his titles, that of the Earl of Carrick. It comes down to the Prince from Robert the Bruce, who the Ayrshire folk contend, was born at Leuchmaben, but at Turnberry Castle. Bruce inherited the earldom from his mother, through whom our royal family is connected with the ancient Celtic lords or kings of Galloway. As colonial-in-chief of the Royal Scots Fusiliers and as Earl of Carrick, His Royal Highness will have a double interest in his short sojourn in the Burns country.

### Plan Fast Air Service

A ten to twelve hours air service between Hamburg and New York is the aim of a newly-formed scientific research society for aviation in higher altitudes, known as the "Gesellschaft fuer Hoehenflugforschung," established in Berlin.

### She Couldn't Sleep Heart Was So Bad

Mrs. J. D. McMillan, Charlotte, N.C., writes: "About a year ago I was greatly troubled with my heart."

I could not sleep at night, and was so nervous I imagined that I could see people at the great personal cost and would have to turn on the lights before I could go to sleep.

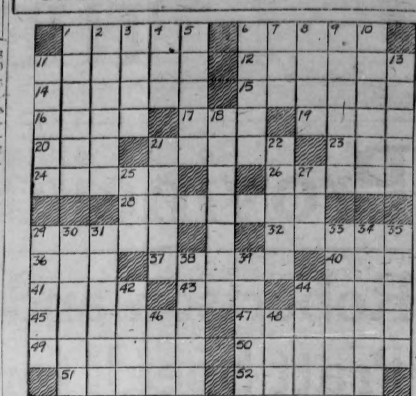

After having read of your

I took several boxes of them, and now get a full night's sleep without any trouble, and feel fine in every way. As I am now a mother, I would have to turn on the lights before I could go to sleep.

After having read of your

- 40—American Automobile Association (abbr.).
- 41—A derling.

### Satisfied With Canada

Scottish Settler Says He Is Not Sorry He Left His Native Heath

In a recent letter written to the Canadian Government, an emigrant agent at Glasgow, Scotland, R. H. Chisholm, of Killam, Alberta, who came to Canada last summer under the British assisted family farm settlement plan, writes in part: "We are getting along all right in Canada, enjoying farm life and being in the best of health. We have settled among some very nice neighbors, most of whom are Scotch. We had a very nice trip coming out from Scotland. We landed at Quebec on the 13th June and from there went to Montreal where we had our first week-end. From Montreal we went to Winnipeg, which impressed me as being a very nice city. There it was told that we were to go on to Sedgewick, Alberta. We arrived there at three o'clock on the Thursday morning. We stayed in the hotel until daylight when we were taken to a farm. I started to work the next week on a place ten miles from home and worked there until the 1st November. I went home every weekend and always found my wife and children getting along fine. I got good wages all the time. In November I got a transfer to another place. I am now ready to start on my own in the spring. I have five horses, three cows, two heifer calves, a number of hens, etc., so we are doing well. We are making butter and selling it at the local store and the rest of the produce from this place to keep the house going. I think if a man makes up his mind to work and tries to adapt himself to conditions, he will get along all right in Canada, at least I can say that I have not been sorry for coming. One can get here what it is not possible to get in the Old Country, with very little money, and that is a farm. It seems to me that those who would like a farm should come to Canada with as little delay as possible."

### Dairy Council of Canada

J. A. Coulter, of Moose Jaw, head of the Gaultier Creameries, Ltd., was elected president of the National Dairy Council of Canada. W. F. Stephens, of Quebec, vice-president; D'Arcy Scott, secretary-treasurer. Executive committee representing the different provinces was elected as follows: R. T. Hurford, British Columbia; W. W. Prever, Alberta; James Garrahan, Manitoba; Wm. Newman and W. F. Westgate, Ontario; A. A. Porter, Quebec, and A. H. Cullen, Nova Scotia.

### Doctors Warn U. S. Women

Twenty-four leading American medical men are meeting in New York to point out to American women the danger of the current craze for boyish fashions. They have criticized the desire for thin bodies as a "man's world" without relation to national health, and warned the women that their attempts drastically to reduce their weight are endangering the health of the future generation.

### The Prosperous Belt

Mineral Belt Between Eastern and Western Canada To Solve Economic Problems

A prediction that "Canada's greatest economic problem—the division of the east and the west by a wilderness two thousand miles wide" would within half a century be a solid belt of prosperous territory, was made by Hector Charlesworth, prominent critic of Toronto, Ont., in an address to the Canadian Club of New York. He looked for mineral developments to offset the change.

Taking as his subject, "The Migratory Canadian," Mr. Charlesworth said the "exiled" Canadian was like the migratory bird, whose home instinct was always calling him back. No country in the world was so much lured by her native sons as Canada, he declared.

The Dominion was pictured by the speaker as the greatest contributor to the intellectual and material progress of the United States.

### Mother Graves Worm Extirpator

Will drive worms from the system without injury to the child, because its action, while fully effective is mild.

### Motors For Roller Skates

Propelled by small acetylene or gasoline-burning motors, roller skates devised by a German engineer are said to develop considerable power and will run not only on pavements, but on rough surfaces as well. Controls are operated through connections reached with the hands. The engine is built on principles discovered in making small motors for aeroplanes. Popular Mechanics.

## Movement To Link Up The Various Wheat Pools Into A Close Association

An international wheat pool similar like an exceedingly ambitious project. National wheat pools, themselves, are bold conceptions based on strong faith in the co-operative principle. Some, no doubt, will suggest that the success of the national pools should have been assisted by a longer experience before there was any thought of an international pool. The organization which is being formed at the present meeting at St. Paul, however, is not, strictly speaking, an international pool. It is not proposed to be a national pool. It is not proposed to put the wheat from the different countries into one pool, but rather to link up the various pools in a close association.

It is hoped to graft from one another's experience in pool management, and it is planned to secure complete and accurate information regarding crop prospects in different countries, available grain supplies and the demand from importing countries. Then the idea is, according to pool delegates at St. Paul, to feed the grain on to the market as it is required and in such a way as to obtain the best price for the farmer in the various pools the full price which the actual condition of the world market warrants.

This is all quite intelligible and shows a natural development from the individual pools. The future of the international organization depends, of course, on the fortunes of the separate pools. Some will say that that is assured, while others consider them still in the experimental stage. The latter dwell on the fact that a wheat pool is a huge business proposition whose success depends on many different factors. They say that the prevailing high prices have enabled the pools to pay the farmers a good return, as a result of which they have been well satisfied, but that if there were a serious slump in the world market and a drop in prices, things would not run so smoothly and the pool might be severely tested.

The farmers of Western Canada have been encouraged to go into the pooling of their wheat by their success in other co-operative enterprises, and they are bent on giving it a good trial. It is the farmer's own business, and wherever it is found to be the best plan for marketing the grain will be in the best interest of the whole country—Manitoba Free Press.

### Trying To Combat Weed Menace

#### Experiments in Crop Rotation Will Be Conducted in Manitoba

A definite programme of experiments in crop rotation will be launched in eleven sections of Manitoba this year as a means of combating the weed menace, according to Hon. A. E. Freeland, minister of agriculture. The experiments will be conducted over a three-year period. There will be five plots of an acre each put into seed in each section.

The first year one plot will be sown in grain and then planted in sweet clover. The second year the clover will be in grain and then have rye planted in the stubble following the cutting of the grain. The third plot will be sown in grain and plowed the same day as cut. Plots 4 and 5 will be sown in grain and treated to the ordinary fall plowing.

During the second year the clover and rye on Plots 1 and 2 will be cut and the ground cultivated until Oct. 15. Plot 3 will be treated the same as the previous year, and Plots 4 and 5 summer-fallowed.

Wheat will be sown in all the plots to third year and a close check kept on the yield.

#### Forbidden to Marry Christians

Muslim women are not allowed to marry Christians by the terms of the modified form of the Swiss Civil Code now before the Turkish National Assembly for ratification. The law which prohibits polygamy and divorce by the mere whim of the husband declares as null marriages contracted with Christians.

#### Cannot Enter House of Commons

It is interesting to note that the House of Commons is the one room in the empire within which the King cannot set his feet. As he is to the throne as my liege, for the past 15 years from a visitor's gallery, but as King he is forever debarred from hearing or meeting them at work.

The deaths of passengers on British railway trains have averaged three yearly for the past 15 years. Travelling by railway seems to be safer than living in bed.

W. N. U. 1629

### Saskatchewan Dairy Pool

#### Organization Plans to Avail Itself of Act Passed Last Session

The Saskatchewan Dairy Pool will incorporate under the title "Saskatchewan Dairy Co-operative Marketing Association." This decision was reached at a meeting of the provisional directors held at Regina.

The association will be incorporated under the new act, passed at the last session of the legislature, providing facilities for the incorporation of pools without the necessity of securing a special private act of incorporation.

The directors conferred with Hon. C. M. Hamilton, minister of agriculture, and Hon. J. A. Cross, attorney-general, regarding the possibilities of organizing a province-wide dairy pool. At the close of the conference they declared they had been very favorably received by the members of the government.

It was also decided to canvass the northern part of the province with a view to according that part of the province proper representation on the provisional board of directors.

It is proposed to absorb the organization known as "The Dairy Pool, Limited," which was established about twelve months ago to cover the Regina district.

A province-wide campaign for contracts will probably be under way by the end of March or early in April. The directors were in conference with Norman Clark, president of the Alberta Dairy Pool, who has given advice regarding the difficulties to be expected in the organization of a dairy pool and how they were overcome in Alberta.

### Natural Resources Bulletin

#### The Economic Value of Wild Life in Canada

The natural resources intelligence service of the department of the interior at Ottawa, says:

In addition to fur-bearing animals, so conspicuously identified with the fur trade of Canada, the Dominion is richly endowed with other wild life which, though not commercialized in the same sense as deer, forms a national asset of incalculable value. Canada possesses a wealth of game species as well as of the bird life indispensable to agriculture and horticulture. The moose hunting grounds of Eastern Canada, the bear and mountain sheep of British Columbia, game animals, birds and fisheries in unusual variety, have given the Dominion exceptional natural advantages in its means of recreation for the hunter and the angler.

The economic value of wild life, and of the magnificent scenic resources which it affords, has been recognized abroad in great numbers, have been given practical recognition by the Federal and Provincial Governments. In no respect has the administration of Canada's natural resources been more wisely exercised than in the liberal provision made for the creation and maintenance of a system of national and provincial parks and game preserves. While these areas, covering many thousands of square miles, indirectly yield a generous return upon the public monies invested, they represent a factor in national wellbeing which cannot be fully measured or appraised by monetary standards.

### A Lancashire Colony

#### Move to Establish Lancashire Families On Land in the West

Lancashire traditions are to be perpetuated in Canada by a new organization, called the Lancashire Settlement Association, according to advices received from London. A considerable sum of money has already been raised. It will be used to purchase farms and equipment in Canada and to install Lancashire men and their families thereon. No attempt will be made to establish an exclusive Lancashire colony. The farms purchased will be in the same area, but separated from each other by farms occupied by old and experienced settlers on whom the newcomers can pattern themselves.

### Council Must Pay Reward

An old Council bylaw passed in 1867 when horse-theft was much in vogue, offered a reward of \$40 for securing the conviction of a horse thief, and as this measure had never been repealed, Constable R. J. Moore, of Lucknow, Ont., claimed the reward for capturing and convicting Elmer Daniels, a kid who recently stole a Lucknow liverman's nag and was jailed for the offence. The county council had no other option but to pay the toll.—Toronto Leader.

### Want To Keep Out Infected Plants

Canadian Council Orders Exhaustive Report On Horticultural Industry. An exhaustive report on all aspects of the horticultural industry in relation to the tariff question to be submitted at a future meeting of the council, was ordered at the closing session of the Canadian Horticultural Congress, Ottawa.

Resolutions were passed asking that the Dominion department of agriculture include a practical horticulturist on its staff to prevent the importation of infected trees and plants into Canada, also that the customs authorities more rigidly enforce the customs regulations as affecting importation of horticultural products.

A special committee was appointed to protest to the government against the free importation of fruits and vegetables.

### Overseas Settlement

#### Says British People Hold Too Low a View of Emigration

Presiding at a meeting of the Royal Society of Arts, Viscount Burnham, president of the Imperial Press conference, emphasized that the British people had never treated emigration as a high enough standard. It had not been regarded so much as an act of patriotism as an act of necessity.

Viscount Burnham urged that propaganda should tell only the truth. He did not find fault with the Dominion for demanding a high standard of health, but pleaded that conditions should be thoroughly well-known and a standard fixed.

### Canadians Eating Fewer Apples

#### Due to Lack of Advertising Says Dominion Fruit Commissioner

"Canadians are eating fewer apples than they used to, consumption having fallen to less than half an apple a day," Mr. G. E. McIntosh, Dominion fruit commissioner, says. At the same time, consumption of citrus fruits has increased. Mr. McIntosh says this is due to the advertising that oranges and lemons have been getting. The moral should be obvious: Canada cannot raise citrus fruits. If we want our producers to benefit by the money we spend for fruit, we should advertise the apple—Border Cities Star.

### Salmon Travel Quickly

#### One Recently Covered Nearly 1,200 Miles in Less Than Month

That salmon travel amazing distances in short periods is indicated by the journey of one fish which was liberated at the southern end of Nova Scotia last June and was caught less than a month later in the Moske River, Quebec. Identification was made by means of the silver tag which had been placed in one of the salmon's fins when it was first captured. Its journey was between 800 to 1,200 miles long. By means of the tag, valuable knowledge is being gained as to the habits of salmon and other fish—Rapier Neuchâtel.

### Mexico City's Suburb

As the ground on which the City of Mexico stands was once the bed of a lake, it is not considered safe to build skyscrapers in that city. The highest building there is seven stories.

### Mining and Agriculture

#### Exploitation of Minerals Opens Up Country For Farming

"It is estimated we have used more of the earth's mineral resources in the last 75 years than in all preceding time," said Charles Cammell, deputy minister of mines, in his paper on the "Influence of Minerals on Canadian History and Development" before the twenty-eighth annual general meeting of the Canadian Institute of Mining and Metallurgy at Montreal. Time and again throughout the last 75 years, Canadian development had received extraordinary impetus from mineral discoveries, Mr. Cammell declared.

Previous to the discovery of placer gold in British Columbia in 1858, that province was a wilderness occupied only by a few roving tribes of Indians. The Cariboo rush of 1869 brought the first flood of people to that country and effected a radical change in its history.

History was now repeating itself in Northern Manitoba, Ontario and Quebec on perhaps a less spectacular but probably a more effective scale. Mr. Cammell said the colonizing and civilizing influence of metal deposits was well illustrated.

The exploitation of the country's mineral deposits was making it possible to open up the districts for the development of agriculture.

### Farm Accounting Made Simple

#### Every Farmer Should Keep a Correct Record of His Affairs

Maintaining some form of account is absolutely necessary if the farmer is to be sure that he is farming in the most profitable way. It is the only way to ascertain what return his farm should yield in order to make a profit over production cost, and it is a guide to the farmer in deciding which particular lines of work are profitable and which are not. With the object of supplying a simple and efficient form of farm accounting which will take up little time yet will enable one to keep a correct record of his affairs, the department of agriculture at Ottawa has published a small account book designed to cover a year's work. It gives directions for the making of entries and the taking of inventories, and requires no special knowledge or accounting. It may be obtained for 10 cents from the Publications Branch, Department of Agriculture, Ottawa.

### Greater Butter Output

#### Saskatchewan Shows Increase in Production For Month of January

Creamery butter production in the province of Saskatchewan in January last amounted to 692,299 lbs., as compared with 699,169 lbs. in the corresponding month a year ago, according to a statement issued by the provincial dairy commissioner. While the increase is comparatively small, yet it is gratifying in view of the fact that the output for January, 1925, was unusually high and greatly in excess for the production of the same month in previous years.

### Wins First Case

Miss C. E. Young, who has the distinction of being the first woman counsel in a breach of promise action tried in a British court, has won her first case. The total last two days the jury awarded the plaintiff, a woman, £74 damages.

## No Efficient Alternative Yet Devised for the Influence Of the Home Life on Children

### Farms in Hudson Bay Area

#### Demonstration Farms Operated Along the Hudson Bay Road

Further details of the experiments in growing agricultural products along the Hudson Bay Railway line, just issued, indicate that the policy is much broader than the recent announcement indicated.

The three demonstration farms are located at Hudson Bay Junction, Mile 137, and Mile 185. In addition to these, the department has arranged to have a full line of agricultural products grown at Mile 42, Mile 81 and at Port Nelson.

The products to be grown are wheat, oats, barley, peas, clover, grasses, turnips, carrots, mangel wurtzel, lettuce, radishes, beets and onions.

Adequate records of the progress of everything planted will be kept and in the course of a few years a large body of facts on production in the northern part of Manitoba will have been accumulated.

### Manitoba Dairy Industry

#### Production of Creamery Butter Shows a Substantial Increase

Substantial progress was made by the dairy industry of Manitoba during 1925, as shown by the annual report of the provincial dairy branch. The production of creamery butter was 13,582,312 lbs., an increase of 1,039,595 lbs. over 1924, and in addition a conservative estimate places the butter fat shipments to the United States from Southern Manitoba at 1,000,000 lbs. for the twelve months. The total output of cheese last year amounted to 765,407 lbs., an increase of 261,774 lbs. over the previous year. Export of creamery butter last year, mostly to Great Britain, amounted to 215 carloads, or 154,000 fifty-six pound boxes, valued at \$2,116,480.

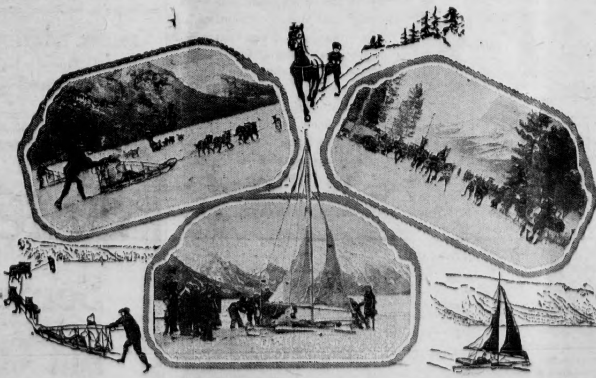

### For Spring Work

#### Increased Amount of Land Ready For Cultivation in Manitoba and Alberta

According to the estimate of the general agricultural agent of the Canadian Pacific Railway, land prepared for spring work in Western Canada shows an increase of 756,709 acres in Manitoba, an increase of 283,797 acres in Alberta and a decrease of 1,308,938 acres in Saskatchewan. The decline in Saskatchewan is largely attributable to the smaller amount of full ploughing accomplished which will be remedied as soon as farmers get on the land in the spring.

### Satisfied With Definition

Dr. Samuel Johnson disliked the Scots and took every occasion to manifest that dislike. Even in his dictionary he defined "soft" thus: "In Scotland food for men; in England food for horses." He asked a Scotch friend how he liked it. "Couldn't be better," said the friend, "and you might have added that there is no food equal to it, for where will you find such horses as in England and such men as in Scotland?"

All Winter Sports at Banff

Ice-skiing, dog-sledding, skiing were the highlights of the Banff Winter Sports Carnival recently concluded at the Rockies resort and they were enjoyed within a setting that has not its equal in the world. Some of those majestic surroundings are shown in the above photographs with snow-mantled, forested mountains and the rolling cliffs that encircle Lake Minnie. The dog derby for the Strongest Trophy was another of

others. In addition to the big sporting events that were decided, there was always something for the spectators to do besides watching other people give exhibitions. The attractions of summer in winter time have a real rival here where the full glories of a Canadian winter can be enjoyed to the full. There is less need to fly to Florida or California when Canada has this to offer to its sons and daughters, and the younger generation are well aware of this.

Modern civilization has, as yet, devised no efficient alternative for the influence of the home on children and that influence has been steadily on the decline. As the Bishop of Ely has said, the decay of family life is at once the cause and the outcome of the degeneracy of national character, and character, "infinitely more than the strength of its armaments, or the prosperity of its commerce, or the abundance of its wealth, is the security of a nation." The Roman Empire had its root in the once strong simplicity of the homes of its citizens. It fell, as the mordant pages of Juvenal tell us, with the atrophy of that home-life.

The motor car, the film, and even the press, have been blamed for their part in the social evil which is evidenced in a decay of home-life. There are undoubtedly agencies at work which, collectively, not singly, have a psychological influence of a sinister character. More than anything else, however, the decay of home-life has marched side by side with the decline of home-education and the influence over by the state of the care and culture of the young. The home could mould characters of the most virile kind. The state cannot. It has failed in a large measure to stimulate the juvenile imagination. It has not been a character-builder. It has, to an extent, alienated the children from their homes by performing duties which previously were the prerogative of parents alone.

There is another influence at work to destroy the discipline of home-life. Applied science is daily adding to the store of conveniences and luxuries, and with them the growing desire for pleasure and ease and luxury deeply affects the ordinary standard of parental duty. The desire has a tendency to make the individual, not the family, the unit of life and of society. It inculcates selfishness, and selfishness, as nothing else, dissolves home ties.

It is here that the parents themselves are largely to blame, for, with the increase in luxuries, they do not endure hardship for their children's sake to the extent that they did of old. They are less sensitive in this respect than they used to be. They do not take the trouble to study and to know their sons and daughters, for they realize that the welfare of the latter is being made more and more a matter for the state.

Thus, there are germs of evil at work, and it is difficult to say what the antidote should be, especially when the handicap of state-interference in an unbroken walk of life continues to grow heavier. There is one sure antidote if it were applied and that is religion, but where parents are irreligious what may be expected of their offspring? Religion has got to reduce its place in the family life. If there is to be a recasting of national character, it must be "pure religion, breathing household laws." Earnest, careful thought and prayer on the part of the parent can solve the problem. Now hundreds, say thousands, of parents are content to let the subject through indifference or indolence.

There are signs of evil, but that does not mean that the era should be closed to the evidences of good that may be set to work. It requires organized effort to rebuild parental duty and the talk lies in the hands of the parents themselves. The state is impotent. The forces for good are only dormant, not dead. There are still countless homes in which they are seen at their purest and best. The symptoms of social disease are unmistakable and the remedies can be applied. Observe principles in the only wise and safe rule.—Daily Colonist.

### Endows Monument To Eve

Robert Quillen, author and paragrapher, who recently attracted considerable attention by erecting in the front lawn of his home a monument to Eve, the first woman, has applied for a \$10,000 endowment life insurance policy to be used as a trust fund in perpetuating the monument. Under the terms of the application flowers would be placed regularly against the monument, the lawn mowed, trees pruned and an annual bath with some classical and natural given the small marble obelisk.

### Bible Contains Milton's Signature

Containing the signature, "John Milton, Feb. 24, 1624," a Geneva Bible, 1586, has just been found "entirely out of guarantee," for \$205, to Mr. Halliday, of Leicester, at Sotheby's, London. Milton's signature is on a piece of rough paper pasted on the inner front cover. Near it is another signature, "Elizabeth Milton," the name of the poet's third wife.

**The Mirror Mail**

tising 15c and 10c per line.

All advertising payable month-  
ly with the exception of single in-  
sertions which are cash. All job  
work cash.

Wednesday, June 10, 1925

**Indifference**

This word is a symbol of more  
depression and lassitude than  
any other word in the English  
language. It stands for the  
downfall of many promising  
towns, many promising sports  
and a half dozen other different  
things.

At this moment the indiffer-  
ence of some of our young peo-  
ple has led to the dissolution  
practically of all sport and rec-  
reation. Some little time ago  
a Tennis Club was formed for  
the season, and officers elected.  
What has happened? Not one  
meeting has been held since,  
not a racquet wielded, not an  
attempt to improve the courts;  
what's the matter? Indiffer-  
ence. Members of the club are  
now forsaking it and joining  
with neighboring towns, which  
will kill any attempt to carry  
on here if it is not curbed. An-  
other meeting will be called  
next week and we trust that a

big representation will be pre-  
sent to take the matter in hand  
at once. Could not the officers  
call for volunteers to fix the  
court in this way the non-  
players will give the players  
their moral support so that  
greater interest will be taken  
all-round, and help the mem-  
bers of the Tennis Club to do  
its share in quashing the ever-  
growing saying that "Mirror is  
the graveyard of the Tofield  
line", thus leading other orga-  
nizations to take heart. At the  
next meeting, the date of which  
will be announced, the follow-  
ing are requested to be present, and  
as many more as can come: C.  
McNair, H. McNair, J. Russell,  
A. C. McNair, H. W. Panrucker,  
J. Cairns, Messrs. Hopkirk,  
Cairns and Smathers, and  
Misses Ennis, Panrucker,  
and Simpson.

**Here and There**

Navigation of the St. Lawrence  
river is expected to open early in  
the month of April. According to  
preliminary schedules issued by the  
various steamship companies operating  
between Canadian Atlantic ports  
and Europe, 192 ships will visit the  
port of Quebec in 1924.

The Canadian Pacific Railway has  
inaugurated as a special feature the  
serving of afternoon tea regularly  
on all dining, cafe and buffet cars  
throughout the system. The taste-  
ful little menu which the company  
provides includes tea, coffee, cho-  
colate toast, muffins, cake, ice cream  
and preserves at reasonable prices.

The Spiller Company, a great  
British concern with \$150,000,000  
capital, has completed arrangements  
for the establishment of facilities in  
Canada which will entail an outlay  
of \$6,000,000 to finish the plant of  
the Alberta Flour Mills in Calgary,  
with another \$2,000,000 to build an  
elevator at Vancouver.

The second of the two large paper  
machines recently installed by the  
Belgo-Canadian Paper Company at  
Shawinigan Falls, Quebec, has com-  
menced operations. The machine,  
which is the product of the Domini-  
on Engineering Company, is now  
producing newsprint. It will be  
used up and is expected to produce  
a commercial grade of newsprint at  
or above its daily capacity of 75  
tons in the near future.

Speaking at Toronto recently, E.  
W. Beatty, President of the Cana-  
dian Pacific Railway, declared that  
"what Canada is suffering from is  
lack of men, lack of capital and lack  
of those forward policies which will  
enable the country to realize within  
a reasonable time its own manifest  
destiny." He added that he did not  
believe in "exaggerated whispirings  
or in any statements which are cal-  
culated to destroy the belief of Cana-  
dians in their own country."

**In the low-price field  
where is the car  
that equals it?**

Before buying a car—open or closed—in the low-  
priced field, ask yourself these questions:

1. Is it as comfortable and smart in appearance  
as the New Chevrolet?
2. Does it boast of such advanced features as dry  
disc clutch, genuine Duco finish, vacuum gaso-  
line system with tank in rear?
3. Has it an overhead-valve engine?
4. Has it a genuine Fisher Body?
5. Can it duplicate Chevrolet's speed, hill-  
climbing ability and all-round dependability?

Because no other car at or near Chevrolet price can  
answer all these questions and because Chevrolet  
delivers a greater measure of quality and value for  
your dollars than any other low-priced car—this  
is the car for you.

**Around the Town**

**Elks Day July 1 and 2.**

Jas. Cairns has been appointed  
weed inspector for the Mun-  
icipality of Lamerton.

The W. A. will meet at the  
home of Mrs. Cruickshanks on  
Thursday, June 17th.

Blake Downswell left last  
week for Ontario.

Mart. Watters returned from  
the east on Monday.

Don't forget the big carnival  
at Mirror July 1 and 2.

Mrs. A. Moller returned last  
week from a visit to Edberg.

Road work has commenced  
in this division of the munici-  
pality.

Mr. and Mrs. R. M. Devenny  
will leave Mirror shortly; Mr.  
Devenny having been trans-  
ferred to Edmonton.

Read the adv. in another  
column regarding the Noxious  
Weeds Act.

About 25 attended the W. I.  
whist drive in the library build-  
ing on Tuesday evening.

Geo. Wells, of Bashaw, has  
been appointed Returning Of-  
ficer for this constituency with  
headquarters at Mirror.

In the neighborhood of 30  
are taking in the basketry  
course being given by Mrs.  
Wood under the auspices of  
the W. I. this week.

The W. I. last week was ad-  
dressed by Rev. Mr. Morgan,  
who spoke on "Religion in the  
Home and at School." Over 40  
were present.

The meeting of the Ladies  
Aid scheduled for this week  
has been postponed until a  
week from Thursday.

H. J. Snell Sight Specialist,  
will be at the Imperial Hotel,  
Mirror, on Wednesday June 10,  
and every third Wednesday of  
each month.

Mrs. J. P. Watters and Mrs.  
E. L. Smathers returned Mon-  
day from Calgary after attend-  
ing the Grand Chapter of the  
Eastern Star and spending the  
week-end at Banff.

A lawn social will be held on  
Friday evening, June 18th, un-  
der the auspices of Lake Bend  
Community Club at the home  
of Mrs. L. E. Humphrey. Ice  
cream and cake will be served.  
Everybody come and enjoy  
yourselves.

**June Rod and Gun**

In view of the increase in popu-  
larity of Ontario and Canada gen-  
erally with American tourists, the  
June issue of Rod and Gun which  
is a special Ontario tourist num-  
ber is particularly interesting.

The regular gun, fishing, out-  
door and kennel departments con-  
tain especially interesting mater-  
ial for this issue.

**Public Notice  
Re NOXIOUS WEED ACT**

Clause 4 (1)  
Duty of Owner or Occupant  
of Land

"Every owner or occupant  
shall destroy all noxious weeds  
on the land he owns, occupies  
or has the right to occupy, and  
on the area between the bound-  
aries of the said lands and the  
centre line of all contiguous  
roads and road allowances, and  
if he makes default in so doing  
he shall be liable on summary  
conviction before a justice of  
the peace to a penalty of not  
less than five dollars and not  
exceeding fifty dollars and  
costs."

Municipal District of Lamer-  
ton, No. 398:
